Dear Mr. Gooding,

This is to acknowledge receipt of your email to the Public Service Commission of South Carolina. Your email will become a part of ND-2015-20-E - Duke Energy Carolinas: Foothills Transmission and Substation Project- 45-Mile Transmission Line Between Asheville, NC, Power Plant and New Substation Near Campobello, SC, and will be posted on our website under this docket.

Please let me know if you should require any additional information.

Sincerely,

Deborah Easterling
Administrative Coordinator

Subject: Duke Energy Power Transmission Project #ND-2015-20-E

Ms. Boyd:

As a landowner who retired to upstate South Carolina to escape the frantic pace of life in Atlanta, I am deeply disturbed by the prospect of Duke's proposed construction of a high voltage power line through my community- and my land. This area is unique in that its history, culture and economy has been and is dependent upon farms and small businesses. The environmental impact of the maintenance of such a line would be devastating to water quality, to individual farmers and to those who depend upon tourism for their income.

It has not been clearly explained why a power line of this magnitude is an advantage to citizens of Greenville and Spartanburg counties who would be directly affected by it.

For these reasons I urge the Public Service Commission of South Carolina deny Duke Energy's request to proceed with this project.

Thank you,
Sidney W. Gooding
